A.1. Current position

Job Title	Investigador/ Ikerbasque Research Associate		
Starting date	2021		
Institution	BioCruces Bizkaia Health Research Institute		
Department / Centre	Structural Biology of Cellular Machines/Structural Biology Unit		
Country	Spain	Phone Number	
Keywords	Structural biology, cryoEM, ribosome, antibiotics		

A.2. Previous positions (Research Career breaks included)

Period	Job Title / Name of Employer / Country
2013 - 2021	Ikerbasque Research Associate / CIC bioGUNE, Centro de Investigación Cooperativa en Biociencias
2007 - 2012	Postdoctoral Investigator/ Goethe-Universität, Frankfurt, Germany
2003 - 2006	Postdoctoral Investigator / Universitätsklinikum Charite, Berlin, Germany
1997 - 2002	Predoctoral Student/ University of Alberta, Edmonton, Canada

A.3. Education

Degree/Master/PhD	University / Country	Year
Ph.D. in Medical Microbiology	University of Alberta	2003
B.Sc. in Biochemistry	University of Alberta	1997

Part B. CV SUMMARY

Sean Connell is an Ikerbasque Research Associate (promoted from fellow and recently passed 1st Associate evaluation) at Biocruces since June 2021. Sean Connell (h-index 24; i10-index 28; citations 3384; Google scholar) is an experienced researcher in the field of cryo-EM and ribosomes publishing high-impact papers in cryoEM since 2001 (EMBO, Mol Cell, Nature, Nat Struct Mol Biol, NAR, Science Advances). He is active in the cryo-EM community serving as a user representative at Diamond Light Source (DLS, UK) since 2018 and paneling user discussion in the CCPEM meetings. He has also organized several local cryoEM workshops (e.g. Applications of Electron Microscopy: Knowledge and facilities in the Basque Country) to promote uptake of the technique in the Basque Country. As a PI, he has supervised 3

experienced scientists, 3 PhD students, and numerous masters/undergraduate students. He is has taught in several Master's level programs including, for example, the "PIE curso de verano" and the Santander Biotech and Biomedicine program.

Sean graduated from the University of Alberta (Canada) in 1997 with a B.Sc. in biochemistry. With funding from an Alberta Heritage Foundation for Medical Research Studentship, he earned his PhD in Medical Microbiology in 2003 from the University of Alberta (Canada) and was awarded the Cangene Gold Award from the Canadian Society for Microbiologists for his thesis on the tetracycline resistance protein Tet(O). From 2003-2006, and with the support of an Alexander von Humboldt Research Fellowship, he completed his first post-doc at the Universitat Charite (Berlin, Germany) where, under the supervision of Prof. Spahn, he began using cryo-electron microscopy to characterize complexes of the translational machinery. From 2007-2012 he worked as an independent researcher at the Goethe- Universitat (Frankfurt, Germany) and studied macromolecular machines like the ribosome and fatty acid synthetase using cryo-electron microscopy.
